For updates, including modified emergency schedules.

For more information and updates, visit www.mta.info.

Listen to television and radio news. This is the fastest way to find out how train service is affected by the weather. We continuously provide information to the media.

Call our Customer Information Center at 212-532-5400. The Information Center will have a taped message upfront describing current service conditions. This is an automated system, so you may experience delays getting through to a representative.

Before You Travel…

□ Always watch your step and look for updates, including modified emergency schedules.

□ Listen to television and radio news. This is the fastest way to find out how train service is affected by the weather. We continuously provide information to the media.

□ Always use stair handrails. Water dripping from overcoats, boots, and umbrellas can ice up with the slightest temperature drop, making stairs very slippery.

□ Always avoid moving from car to car, especially on an ice-covered platform. If you slip and fall on a handrail you can prevent serious injury.

□ Always watch for slippery conditions, even after you board your train. Snow, sleet and ice can make train floors slippery.

□ Keep your shoes dry. A soak of hot water, dripping from overcoats, boots, and umbrellas, can temporarily warm the soles of your shoes. Do not use hot water, as this can melt snow and ice so you can’t see the slippery patches.

□ Always watch for slippery conditions, even after you board your train. Snow, sleet and ice can make train floors slippery.
